

## She's Beautiful When She's Angry (2014) Review.

On Friday the 21st of August I attended a screening of *She's Beautiful When She's Angry* at the London Feminist Film Festival in the Rio Cinema. Directed by Mary Dore, this documentary celebrates the almost forgotten history of the women's liberation movement from 1966-1971.

*She's Beautiful When She's Angry* is a mix of modern day interviews weaved together with archival footage of protests, meetings and political speeches. Whilst it mostly focuses on gender it also touches on the intersectionality of race and lesbianism and the conflicts that did arise through these issues within the feminist movement and continue to today. The best thing about this documentary is that it encapsulates the spirit of the 1960s-70s without romanticising the time period, it is both funny, infuriating and heartbreaking at times, particularly when discussing the illegal Jane Collective who helped thousands of women have safe abortions. I found the film particularly interesting
